

The **Infinity™ Horizontal Patient Service System** is constructed of aluminum alloy deep etched and clear anodized. Pre-piped and Pre-wired for single point connection and with provided ceiling mounting plates with appropriate knock outs; this unit is easy to install and maintain.

The services you can choose include fixed and movable medical gas, normal and emergency power, and communications all within a single rail, with or without a vertical service chase.

The Infinity is designed for maximum use of available space. From a single rail spanning a recovery area to a three-rail system in an intensive care unit, any combination can be designed to accommodate your needs.

Features:

- Available up to 17 feet in a single continuous section
- Available with vertical chase
- Comes in a variety of colors and textures to meet any aesthetic
- Single, Dual or Three rail systems
- Integrated Horizontal equipment rail
- Able to span windows
