

With an eye to finished details and an infinite number of finishing combinations, the **Array SSH** is made to meet any design aesthetic. The Array gives the room a millwork feel while maintaining the convenience of a build to order pre-engineered, pre-fabricated headwall solution. The Array is constructed of a 16 gauge steel stud structure with removable finishing panels for ease of routine maintenance.

Features

- Surface and Recess mounted
- Integrated vertical and horizontal equipment rails for better equipment management
- Available with 3/8" aluminum trim or with wrapped panels
