

The **Moveable Cogent™ Training Headwalls** are specifically designed for teaching labs and institutions. The vertically configured headwall provides Vacuum, Air and simulated Oxygen\* just by plugging the unit into an electrical outlet. The Moveable Cogent™ Training Headwall provides an inexpensive and quick method for simulating a patient room's medical gas services, while giving the freedom of a moveable simulation solution that maneuvers easily from one bed to the next.

The Moveable Cogent™ Training Headwall is designed to meet your needs. The traditional simulation lab training headwalls provide wall mounted solutions that require installation. The Moveable Cogent™ Training Headwall solution was developed to provide Vacuum, Air and Electrical Power on the go; in a self contained unit that solves typical problems with lab renovations and space issues.

\*Oxygen simulated with air.

\* Cogent™ Training headwalls compliment simulation, not designed to run a simulation manikin. Maximum 50PSI

## Features

- Available in Single Sided and Dual Sided Configurations
- Locking Casters, 2 Fixed and 2 moveable, make for easy maneuverability

## Available Options

### **Add**

- Integrated Non-Functional Nurse Call\*\*
- Integrated Non-Functional Code Blue\*\*
- Integrated White Dry Erase Board
- Oxygen Flowmeter
- Medical Air Flowmeter
- Vacuum Regulator [Continuous]
- Vacuum Regulator [Continuous/Intermittent]
- Vacuum canister and holder
- Additional Mounting Brackets as requested

### **Delete**

- Delete pump and/or compressor [eliminates functionality]

US Patent # 7,878,809

\*\* Blank for Nurse Call and Code Blue provisions is standard.
