

The **Medical Gas Hose Reels** are designed for use with non-flammable medical gas and vacuum systems at locations where overhead connection and concealed retracting of the hose is desired.

Each Hose Reel Assembly can accommodate one or two gas service valve connections. Hose Reel assemblies can be field ganged to accommodate multiple gas services. Each gas service reel shall be fitted with twelve feet of hose. Pressure hoses shall be ¼" I.D. Vacuum hoses shall be 5/16" I.D. Reel assembly shall be designed for concealed mounting with a stainless steel coverplate. Each gas shall be indicated by prominent color-coded service identification. The backbox shall be constructed of 14ga. steel. Replacement of hoses and minor service shall be accomplished without totally removing reel assemblies from mounting box. Connections from Reel to pipeline shall be through DISS outlets to allow use of the piping systems when Reel is disconnected.
