

The **Mirage Patient Care System** provides all the advantages of modular headwalls while maintaining a warm, comfortable appearance.

The Mirage Patient Care System is constructed of hardwood, with either a natural wood veneer, or overlaid with high pressure plastic laminate. All doors open and slide out of the way into pockets. Medical gas and electrical services are carried in U.L. listed compartments. All access panels permit servicing and connections to be made within the unit.

Features:

- Heavy duty high pressure plastic laminate or real wood surfaces
- Special pocket doors conceal services when not in use
- Secondary equipment remains in place when the doors are closed
